Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - I. Species I, Claims 41-54, drawn to a stitched MONOS memory array, classified in class 365, subclass 185.18.
 - II. Species II, Claims 55-72, drawn to a plurality of memory cells in a MONOS memory array, classified in class 257, subclass 324.
2. The inventions are distinct, each from the other because of the following reasons:
Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combination (MPEP 806.05©). In this instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility such that a stitched MONOS memory array in group I can be used in group II and does not require all of the limitations as in group II.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by either different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement to be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
6. Any inquiry concerning this communication or earlier communication from the examiner should be direct to Phuc T. Dang whose telephone number (571) 272-1776. The examiner can normally be reached on Monday through Friday from 8:00am to 5:00pm.
